DETAILED ACTION***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The plasma beam source having a nozzle extending outwardly from said discharge cavity having a first width, said nozzle having a second width which is less than the first width; at least one electrode for supporting at least one magnetron discharge within said discharge cavity; a plurality of magnets disposed adjacent said cavity for creating a magnetic field null region or at least one magnetron confinement region within said discharge cavity (claims 20, 30, 36, 39, 44); or said magnets disposed exterior of said discharge cavity generally facing one another for creating a cusp magnetic field within said discharge cavity and having a null region (claim 37 and 38); a cusp magnetic field defining a magnetic field null region disposed within the cavity, said cusp magnetic field comprising a first portion creating a closed drift electron magnetron confinement within the cavity, and a second portion producing a mirror confinement region passing through and out of said cavity through the nozzle (claim 35). The remaining claims 21-29, 31-34, 40-43, 45 and 46 are allowed by virtue of their dependencies from the independent claims. Hence, the examiner has allowed claims 20 through 46.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Brcka, Patent No. 6,446,572.
